Their Protest Against the Tyranny of the Ring-Appointment of a Committee to Examine the Accounts-Manifesto from the Management.

The disgraceful scenes that were enacted last Tuesday evening at the annual meeting of the above ssociation, now that the participants in them have deme to reflect after the smoke of battle has tted, have met with the universal condemnation of all concerned. The "Reformers," who in that pattle were repulsed, they claim, traud upon the part of Charles F. Allen and his ring, the desired to retain permanent control of the association's affairs, felt called upon to take some action looking to placing themselves right before the public, and with this object in view about two hundred assembled last evening at Masonic Hall, in East Thirteenth street.

A. W. Green, chairman of the General Committee, occupied the chair, and briefly reviewed the affairs of the society, which has been in existence for fifty years, characterizing the manner in which the busiess of last Tuesday evening was conducted as a fraud of the worst kind, and the proceedings as not an expression of the association. It was, he said, o prevent a repetition of the scenes of that meettor, which were a disgrace, that this meeting was called, to take such action as will prevent that re-

Mr. J. N. TIPPT was chosen permanent chairman. and while declaring that on Tuesday night the hall was packed he urged the members to adhere strictly to the rules of the society in all their efforts to ac complish the reforms sought for,

Mr. A. J. Stone effered the following preamble and resolutions:-

and resolutions:—
Whereas the manner in which the annual meeting of the Mercandic Library Association, held at Clinton Hall on Tuesday evening, May 9, was conducted, has subjected the association to the reproach and consure of the public of New York; and whereas it is proper that the members of the Mercandic Library Association should endeavor by every means in their power to remove the edium cast upon their good name by the published reports of that meeting; now, therefore, it is

in their power to remove the collum cast upon their good name by the published reports of that meeting; now, there was the property of the published reports of that meeting; now, there is a second of the facts in the case we charge against the pre-ent directors of the association that there is of admission to the association that the pre-ent directors of the association that the pre-ent directors of the association previous to their distributed by officers of the association previous to the statement of the previous that the present which contains the present of the previous that the present the previous that the previous the previous that the chairman of the meeting, by gross partsauship, by unjust and unparliamentary rulings previous day expression of opinion by the opposition, and concluded the business while a very large number of the members had not yet even obstituted the tickets of admission; that many resolutions, including one of thanks, to the chairman and his associates, for their conduct during the part year, were recorded as passes, without having been either audibly stated by the chairman or intelligently voied on by the meeting. the stated by the comments, in the strongest pos-d, That we desire to express, in the strongest pos-d, That we desire to express, in the strongest pos-

parinamentary action of the chairman of the annual meeting in stilling debate by refusing to admit appears from his decisions, and by roling out of order cails for a division and motions to adjourn.

Resolved, That we, members of the Mercantile Library Association, protest against the disposerry proceedings of last Treastay seening being considered coargeable to us, inasmuch as the majority of those there present were illegally supplied with admission thetetas, without any inquiry into their qualifications, by which the control of that meeting was intentionally taken out of the hands of the association by the acts of its officers.

They were seconded by Henry D. Lloyd, who endorsed what the press had said as to the meeting being a rictous one, but he declarred that the parties who so conducted themselves were firoadway statues, threves, gambiers, pickpockets and keepers of low houses of questionable entertainment, and not the members of the association. If was notorious, he declared, that a large number of them came from the Sinclair House, where the directory had furnished them tickets, and an ex-president had given them instructions as to the signal for negative and aftromative voting. The speaker reviewed the figuacian statement of the association for the past two years and showed that, while the receipts had increased dast year \$20,000, the expenses for light, care of halls, prinking, &c., had been increased by \$13,000. He hinted that much of this sum may have been expensed in purchasing votes. He declared that before the meeting adjourned he would move for the appointment of a committee to investigate the estimant appealing to any higher power. Messrs, Hunt, Stonewan, E. J. Wright and others bore testimons to the fact that there was fraind practised by the ring in packing the meeting with persons not members. The resolutions were adopted.

The following resolution was also adopted:—Reastread, and reconsidered through the resolution and Henry D. Lloyd were named as such committee.

A. W. Green, D. M. Jarvis and Henry D. Lloyd were named as such committee.

An amdavit from a man named Cole was read, in waich he swore that he was in the Sinciair House party and instructions given them how to vote. A gentlemen present stated that he had an affidavit man who d'dn't want his name mentloadd, who testified that, with members of the St. Domingo Club of the Sixteenth ward, who were not members of the association, he went to the Sinciair House, where tickets were issued and instructions given how to vote. When President Alien raised his gavel they were to vote aye, when he lowered it, in the negative, and when he threw in both arms they were to give three cheers, and at the close were treated to champagne and lobster

the close were treated to champagne and lobster salad.

Mr. Charles T. Allen, who was present, was invited to speak, and merely said that the statements of Mr. Lloyd as to the finances were incorrect; every facility would be farnished for an examination of the books and accounts, and if one dollar was found misrepresented he would pledge the whole board of management to resign.

After the adopted of a resolution endorsing Mr. Lloyd's action on Tuescay night last in claiming his partiamentary rights against the hired instraments of Charles T. Allen, president of the association, and the appointment of a committee to inspect the election on Tuescay night next, the meeting adjourned. The proceedings last evening were very orderly and redected much credit upon the young men who participated in it. From the sprit manifested it is probable that an amicable understanding will be arrived at between the respective factions.

understanding will be arrived at between the respective factions.

THE OWER SIDE ON THEIR DISENCE.

The following address has been prepared and circulated by the "regulars" in the association:—

New York, May II, 1871.

To the Publice—

During the past few days there have appeared in the public priots numerous appeals to the members of the Mercantile albrary Association by certain persons styling themselves the "reform party" of the hervanile Library. These appears have been accompanied by the grossest stankers upon the undersigned, members of the board of direction, and by viatements calculated to do very great injury to the institution. Although many of the undersigned have for several years past been the subject of frequent likels of this kind, put forth by the same persons they have never before thought it worth white to notice them, and they would not now do so if they did not fear that the Library may receive some injury in these charges are suffered to be replaced without contradiction.

For this crassin only we submit the tollowing assessments.

be a serious investment to the appointment. It was further arged that there should be greater spacifity in the management of the Lebrary, and that his rabellity would be secured by the state of the st

derence is made in the "reform" circular to an employ in Association who has served at our elections as an in

charies H. Fatrick—were rounding for edice, and when their franch controlled the appointing power—the board of direction.

The d.—It is not true that the raising of the abundal dues has tended to reduce the membership of the Library. The membership is larger than it ever was tefore and is steadily increasing. During the year only fifteen persons have closed their subscriptions because of the increase in the dose.

Fourth—it is not true that the disturbance at the annual meeting is attributable to the undersigned or to their friends. We were informed several days since that the meeting was do be packed by hired repeaters in the comploy of the "Reformers," and we determined to prevent this if possible. There were in the lobusier and halfs of the building, while the meeting was being head, atom four hundred men of this character, many of whom attempted to get tixels of admission by giving names and tottos of members, or by presenting the membership receipts of absent nameers, borrowed for the occasion by reformers. We have now in our possession the most positive criteches that those men were brought have and were in the pay of the "Reformers." A lew days previous to the meeting we were asked to admit to membership twenty persons who were certified to by advance or the "Reformers," as being elected in A. T. Saswart & Co.'s elone. Upon inquiry of one of the partners in the above, it was ascertained that of these two was on the way to Europe. Further inquiry devel-

Meeting of the Reform Branch at

Masonic Hall.

Masonic Hall. quiet was restored.

There was every disposition to give the "Reformers" on opboriunity to be heard upon their amendments, but they werso disorderly and unparliamentary that the majority of the
members found it practically impossible to transact furthe
business, and the necessary result was a summary adjourn

se disorderly and unparliamentary that the majority of the members found it practically impossible to transact turther business, and the necessary result was a summary adjournment.

Fith—It is insumited, though not directly charged, that the money of the association have not been "devoted" by the underagned "to the legitimate purposes for which the library was founded." In reply to this we have only to state that the books and accounts of the Library are oven for investigation and examination by any proper person, and we hereby invite the members of the reform party to appoint a committee to examination shows that one dollar of the money received during our term of office has been misappropriated we hereby piedge ourselves to resign our positions and to given the management of the Library to the reformers.

Sixth—The Reformers have dragged into our politics the question of opening the reading room upon the Sabbath, and hypocritically profess that if they obtain power here they will take means to open the room on that day. They know that the reading room cannot be opened on Suniay without the consent has been asked for by the present Poard of Officers, and has been persentiefly refused. What more could the "Reformers" do if they were in power? Nothing, except by violation of the pledged right-not our association. The undersigned have too much regard for the institution to plungs it into a quarrel upon this or any other question with such men as Wilson if, Hunt, Thomas F. Faile. William E. Dodge-John K. Myers, Edmund Coffin, Isaae H. Bailey and Hugh N. Camp, who compose the Board of Trustees of the Clutton, Jial Association; and so long as we control this Library to further steps will be taken to open the reading room upon the sabbath.

See-th—The Mercantile Library was never in so good a condition as now. The addition of books this year has been nearly 12,000 volumes; the membership is larger than it ever was before, and the income for the year is the largest ever received by sweral thousands of dollars, being s

cilices on the tickets. But these overtures have been in every instance rejected.

With these statements the undersigned respectfully submix, their cause and the cause of the Library to the candid and impactial judgment of the public.

Mercantile Library.

TO THE EDITOR OF THE HERALD :-This most excellent institution seems to partake largely of the spirit of the age. At the annual meeting on the evening of May 9 the harmony usually maintained on such occasions seems to have departed, and in its place a scene of disorder that must have disgraced the legislative balls at Albany or that must Tare disgraced the legislative halls at Albany or Washington; angry discussions bitter ceithets coming from both parties charging rascality, deception, frand, packing the meeting with roughs, the only difference in the parties being in the application. "It is you," says the one party, and "it is you," says the one party, and "it is you," says the one party, and "it is you," says the this question? Saal we adopt the language of the Sarbur on the occasion of the woman brought before him by an eretted mob charged with adultery? When the Sarbur hoked upon the crowd mad with excitement and the woman with her head bowed to the earth He exclaimed, "Let him who is without sin cast the lirst stone," and they began to go out one by one until they all disappeared, leaving the woman standing alone in the presence of the Sarbur. He said, "Woman, where are thins accuses?" She answered, 'No man halt accused me." And He said, "Retther do I accuse thee. Go thou in peace and sin no more."

In this controversy both parties seek to protect the Library. This is enouraging and leads its friends to believe the institution will be allowed to continue its ourse of userulness. It is only when one or both parties neglect its true interest that danger may be apprehended. Let list true friends, then, unite in its preservation. It has in the past been to the young man a boon of great value and it is just arriving at its glory. With a library of more than one hundred thousand volumes and a reading room before the country, with an income from Clinton Hall, to be expended in choice literature, it

a brary of more than one hundred thousand volumes and a reading room second to none in the country, with an income from Clinton Hall, to be expended in choice literature, it seems that the only contest should be to secure the best in-terests of the library—"the greatest good to the greatest number."

number."
Young men, the future merchants of this cits, oughs not thus to conduct themselves in a manner requiring the interference of the police. It is a disgrace to the guity parties, and discouraging to the merchants who have in their liberality provided, at great expense, an institution which has done so much to improve and benefit the young men cierks in our city.

M.

### ORITUARY.

Sir John Frederick William Herschel. A despatch from London announces the death, yesterday morning, of Sir John Herschel, the great astronomer. He was the only son of the equally illustrions astronomer Sir Frederick William Herschel, and was corn at Slough, near Windsor, on the 7th of March, 1792. He was consequently in his eightieth year instead of seventy-three, as given in the cable despatch.

The deceased astronomer was educated at St.

John's College, Cambridge, where he became Scalor Wrangler and Smtth's Prizeman in 1813. While yet a youth he devoted himself to the pursuits which had made his father famous throughout the civilized world. His reconstruction of Lacrolx's treatise "On the Differential Calculus," in conjunction with Peacock, contained his earlie mathematical researches. A considerable portion mathematical researches. A considerable portion of the year 1816 was devoted by him, semetimes alone and sometimes with South, to observations on the multiple stars, for which each received a gold medal voted them by the Royal Astronomical Society on February 7, 1826. His observations numbered 10,000, and as a result of them, in 1823 he presented to the Royal Society a catalogue of 350 double and triple stars, whose positions and apparent distances had never before been fixed. A second catalogue was published by him in 1827, containing 1895 stars of this kind, and during the year following. Society on February 7, 1826. Ills conservations numbered 10,000, and as a result of them, in 1828 he presented to the Royal Society a catalogue of 350 double and triple stars, whose positions and apparent distances had never before been fixed. A second catalogue was published by him in 1827, containing 256 stars of this kind, and during the year following another, containing 324 more. In 1850 he published in the "Transactions of the Astronomical Society" a paper in which was recorded the exact measurement of 334 stars and a great number of observations on the measurement of double stars. During the same year he also gave to the public important measurements of 1,236 stars, which he had made with his twenty-foot telescope. While engaged in this work he was also occupied in the measurements of 1,236 stars, which he had made with his twenty-foot telescope. While engaged in this work he was also occupied in the results of which he published in his "Treatise on Sound," which appeared in the "Encyclopedia Metropolitana;" a "Treatise on the Theory of Sound," a "Prehiminary Discourse on the Study of Natural Philosophy, both of which were published in Lardner's "Cyclopedia," and his "Treatise on Astronomy," forming part of the same series. For his "Catalogue of Nebulie" the Royal Astronomical Society, in 1830, again voted him the gold medal. His last great enterprise was his solourn lour years at the Cape of Good Hope (February, 1834, to May, 1838), where he examined the whole Southern celestial bemisphere in the most exact manner and under circumstances in the most exact manner and under circumstances the most exact manner and under circumstances the most exact manner and under circumstances in the most exact manner and under circumstances in the m

#### MLET NG OF THE KINGS COUNTY DEMO-CRACY.

night at the headquarters of the General Committee, corner of Court and Remsen streets. The object of which were made in the address of republican mem, bers of the last Legislature. The chair was occupied

bers of the last Legislature. The chair was occupied by Mr. Thomas Carroll, who stated that the meeting had been called for the purpose of hearing from some of the members of the last Legislature.

Mr. JOHN C. JACOBS made a lengthy speech explaining the messtatements in the address of the republican members of the Legislature. They had gone before the people with a tissue of falsemoods in regard to the state tax. The democracy, notwithstanding the drains on their resources in 1869, had required the State debt over \$2,000,000.

Mr. THOMAS KINSELLA was called upon at the conclusion of Mr. Jacobs' speech and made a few remarks in regard to Congressional matters. In the Legislature Mr. Jacobs represented a majority, but in Congress he represented a minority in the councels.

Addresses were also made by Assemblyman Wm. W. Moseley and W. C. De Witt, Corporation Counsel.

COUNT OF APPEALS.

In Commission of Appears—Ordered, that on and after Monday, May 15, thus Commission will meet at half-past ten A. M. and continue till half-past four P. M. Calendar for Monday, May 16.—Nos. 118, 113, 121, 122, 126, 128, 12, 120, 130, 135, 186, 387, 27, 123, 124;

THE COAL TROUBLES.

ton Miners Diesatisfied with the Terme Proposed by the Companies—Disposition to Prolong the Strike—Work Progressing in Other Regions. SCRANTON, Pa., May 12, 1871.

It is by no means certain that the coal troubles in this section are to be settled as speedily as has been anticipated. It was only by the most carriest efforts on the part of some very influential men among the ners that the region meeting of the Delaware & Hudson Canal Company's miners was induced to adopt the resolution submitted to Mr. Thomas Dickson-viz., that they would go to work and leave the question of wages to be arbitrated upon the basis of pay in any other sections. Nine districts were opposed to the proposition altogether, bu finally gave in to the more conservative three. Mr. Dickson's reply, therefore, is extremely unpalatable and the miners feel that he should have been more generous and not hampered his proposition to arbi-trate with so many unnecessary conditions. It is stated to-day that the region delegates held a meetstated to-day that the region delegates held a meeting last night, at which the matter was fully discussed, but adjourned till this morning without coming to any definite conclusion. The debate was earnest, but harmonious, and the prevailing opinion seemed to be that they had made as fair an offer as any man had a right to expect, and as men they would stand by it. The delegates will be in session again to-morrow, and it is thought will conclude not to accept Mr. Dickson's proposition, appointing, nowever, a committee te confer personally with their emboyers.

again to-morrow, and it is thought win concluding, nowever, a committee to confer personally with their employers.

There is considerable feeting existing among the miners, they having been so much abused lately, and it is only by the most stremous efforts of their leaders that they have been brought to make the concessions alkeded to. If the question was submitted to the mass of miners to morrow a very large majority would be found voting for November prices, but as they have entered on negotiations to arbitrate they are disposed to go on with them if the companies will treat them with equal fairness and frankness. Everybody admits that the proposition made to Mr. Dickson is extremely generous on the part of the men, and much surprise is expressed that that gentleman should have so overweighted his response with conditions that must be considered somewhat oppressive. At one time I was inclined to believe that the miners would accept the advance of five cents a ton offered by the companies, but, from conversations with them to-day, I am satisfied they will determine to abide by the resolution passed at the region meeting on Wednesday. It appears as if suspension is likely to be prolonged unless the companies make more liberal advances. The abortive attempts to array the nationalities against each other, and to provoke collisions between the miners and their laborers, has much to do with the obstinate stand which the men now assume. Their efforts are merely tended to exasperate the workingmen and distract the community, and it is now generally conceded that the movements were nowise and discreditable to the projectors. That they did not succeed in provoking more trouble is owing entirely to the forbearance of the men, a fact move generally conceded that the movements were nowise and discreditable to the projectors. That they did not succeed in provoking more trouble is owing entirely to the forbearance of the men, a fact movements were invites and discreditable to the projectors. That they did not succeed in pro

MISCELLANEOUS. GREAT NATIONAL LOANS. NEW FIVE PER CENT BONDS.

registered certificates of stock and a good part of the couple conds of the new loan of the United States, pearing five per delivery early in the prese the certificates and bonds are ready for market abroad well as at home. The whole sum out qualification, is #200,000,000. When this amount, to which reference is thus given, is taken up, the remainder of the July 14, 18:0, for refunding the public debt, will be offered inconnection with \$200,000,000 four and one-half per cents, and-Ofteen years and the other thirty years.

The following is a cppy of the new five per cent. bond, u der and pursuant to the new loan act of Congress >--

FORM OF FIVE PER CENT, BOND. INTEREST | FUNDED LOAN OF 1881 | FIVE PER CENT. 

Entered - Recorded -

850, \$100, \$500, \$1,000, \$5,000 and \$10,000, and coupon bonds of each denomination except the last two. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer or designated depository of the government, quarterly, on the 1st days of February, Nay, August and November in each year.

The interest on the registered stock of this huan, it is determined by the Treasury Department, will be paid as: conveniently to the holder as on the coupon stock, and personal attendance, or attendance by proxy at the Treasury, to draw and receipt for the interest will be dispensed with, whenever the check of the United States Treasurer, mailed punctually to the address and order of each holder, on or before every quarter day, is preferred to such attendance. This check, payable in gold coin at the Treasury in New York (or such other office as the stock is registered at), will be negotiable or collectable on the endorsement of the owner or owners of the stock. Innursuance of this arrangement the subscribers to or purplete protection against theft or other losses incident to coupon bonds payable to bearer, are advised to give their post office address in full, and to notify of any change in the address between quarter days.

The whole proceeds of the new loan will be applied to the payment or redemption and cancellation of the 5-20 years six per cent bonds, and, in addition to these proceeds, the 5-20's are now being reduced by purchase at the rate of \$10,000,000 per month.

The entire effect, therefore, of the new loan, in conn with the existing Sinking Fund process of the Treasury, is to reduce both principal and interest of the public debt of the United States. The loan creates no additional supply of government stocks, while the application of the surplus revenues derived in gold from customs is constantly lessenfog, as it has been doing for two years past, the funded stocks bearing six per cent gold interest.

The lat of May schedu'e of the public debt, which h luction in these stocks since the April[schedule of \$12,215,700, and a further lessening of the yearly interest charge thereon of \$733,942. This leaves the total yearly interest charge in gold \$111,982 034. In the same month the Treasury paid and cancelled \$2,470,000 of the three per cent currency debt, reducing the whole of this debt bearing interest to \$51,025,000, and the yearty interest charge thereon to \$1,537,470.

The proposed further reduction of the annual interest charge upon the public debt by refunding is as follows:-By exchange of \$500,000,000 United States aix per

cents for new five per cents of 1861..... 85 cm over By exchange of \$200,000,000 United States six per cents for four and a balf per cents of 1886 ...... 4 500 000 By exchange of \$700,000,000 United States six per cents for four per cents of 1001...... 14,000,000

The large and rapid accumulation in the last few years of private capital new retired from active business, and of the cash Savings and Life Insurance premiums deposited with or intrusted to the provident institutions of the country-all seeking the most undoubted security, pledged to be kept free of all taxes, under national or local authority, and content; provided this object be assured, with moderate rates of interest-will no doubt ultimately absorb so much of these new stocks as may not be taken in voluntary conversion of United States 5-20s, or marketed abroad.

The official schedule of the Treasury affords the following classification of funded stocks (in gold) of the United States. as outstanding on the lat of May

FUNDED STOCKS (IN	TATES.	THE UNITE
